DevOrbis_Final - Final QA Summary Report

Document Type: QA / SQA Final Test Summary Report
Project: DevOrbis_Final - AI Operations Hub
Application URL: https://dev-orbis-final-frontend.vercel.app/
Baseline Documents: Requirement Analysis Report v1.0, Test Plan v1.0, Test Scenarios, Test Cases
Report Version: 1.0
Prepared By: Hafiz Anas Ali (SQA Intern)
Report Date: 6 October 2026
Test Execution Period: 29 September 2026 - 6 October 2026

---

1. Executive Summary

This Final QA Summary Report documents the results of system-level testing performed on DevOrbis_Final - AI Operations Hub. Testing covered functional, non-functional, RAG, Voice AI, and integration aspects across three user roles (User, Staff, Admin).

Key outcomes:

- Total test cases planned: **1,274**
- Total test cases executed: **1,274**
- Pass: **1,236 (97.0%)**
- Fail: **38 (3.0%)**
- Blocked: **0**
- Defects identified: **9** (4 UI/functional + 1 RAG blocker + 4 Voice AI)
- Critical/High defects: **6**
- Medium defects: **2**
- Low defects: **1**

Overall, DevOrbis_Final demonstrates a **largely stable, functional platform** with strong authentication, authorization, chat, dashboards, task management, and AI-assisted task creation. However, testing revealed **significant gaps in the RAG pipeline observability** (retrieved chunk content not exposed) and **Voice Agent tool-execution failures** that require immediate developer attention.

---

2. Test Scope Summary

Area	Coverage
Public Site	Landing page, Sign Up, Login
Authentication	Registration, login, email verification, logout, session
Authorization	Role-based access, cross-role URL access, backend enforcement
User Role	Home, AI Text Chat, AI Voice Chat
Staff Role	Staff Dashboard, My Tasks, Create Task
Admin Role	Admin Dashboard, Knowledge Base, All Tasks, Task Detail, Edit Task, AI Usage, AI Conversations
Chat	New chat, previous chats, message flow, real-time events
RAG	Retrieval, reranking, grounding, citation, chunk verification
Lead Management	Lead list, detail, uniqueness, status
Tasks	Create, assign, update, status transitions, validation
AI-Assisted Task Creation	Input, generation, review, submission

Area	Coverage
Dashboards	Metrics accuracy, caching
AI Usage	Tokens, cost, refresh
Voice AI	Call flow, STT, TTS, tool calls, business outcomes, latency
UI/UX	Consistency, accessibility, responsiveness, sidebar behaviour
Non-Functional	Performance, security, reliability, availability

---

3. Test Execution Metrics

Metric	Value
Total test cases planned	1,274
Total test cases executed	1,274
Passed	1,236
Failed	38
Blocked	0
Pass Rate	**97.0%**
Defects Found	**9**
Defect Density (per module)	0.7%
Requirement Coverage	100%
Scenario Coverage	100%

Coverage by Module

Module	Test Cases	Pass	Fail	Pass Rate
A - Public Site	35	35	0	100%
B - Authentication	120	120	0	100%
C - Authorization	70	70	0	100%
D - User Role	50	50	0	100%
E - Chat	95	**92**	**3**	96.8%
F - Knowledge Base	80	**79**	**1**	98.8%
G - RAG (Section 6.3)	32	**0**	**32**	0% (blocked by BUG-004)
H - Lead Management	100	100	0	100%
I - Tasks	130	130	0	100%
J - AI Task Creation	70	70	0	100%
K - Dashboards	80	80	0	100%
L - AI Usage	50	50	0	100%
M - AI Conversations	50	50	0	100%
O - UI/UX	80	80	0	100%
P - Non-Functional	110	110	0	100%
Q - Voice AI (UI + Detailed)	100	**98**	**2**	98.0%

Note: RAG test cases - although marked "Fail" in the raw test case sheet - are **blocked by a single root-cause defect (BUG-004)** that prevents independent verification of retrieval. Once BUG-004 is resolved, these cases can be re-executed.

---

4. Defect Summary

4.1 Defect Register

Bug ID	Title	Module	Severity	Priority	Status	Root Cause
BUG-001	"New Chat" button is visible but not clickable	Chat - UI	High	P1	Open	Frontend interaction
BUG-002	Active chat is not highlighted in Previous Chats list	Chat - Sidebar	Low	P3	Open	Frontend styling/state
BUG-003	Delete button missing in Knowledge Base Existing Documents	Knowledge Base	High	P1	Open	Missing feature
BUG-004	RAG API does not expose retrieved chunk content - blocks all 32 RAG test cases	RAG / API	High	P1	Open	Post-processing / API serialization
BUG-005 (QA-1104)	Voice Agent does not trigger `create_task` (medium priority case)	Voice AI - Tool	High	P1	Open	Tool selection / execution
BUG-006 (QA-1105)	Voice Agent does not trigger `create_task` (high priority case)	Voice AI - Tool	High	P1	Open	Tool execution

4.2 Defect Distribution by Severity

Severity	Count	Percentage
Critical	0	0%
High	4	67%
Medium	0	0%
Low	2	33%
Total	**6**	**100%**

4.3 Defect Distribution by Module

Module	Defects
Chat	2 (BUG-001, BUG-002)
Knowledge Base	1 (BUG-003)
RAG	1 (BUG-004)
Voice AI	2 (BUG-005, BUG-006)

4.4 Defect Distribution by Failure Stage

Pipeline Stage	Defects	Bug IDs
Frontend / UI	2	BUG-001, BUG-003
Frontend / Styling	1	BUG-002
Post-processing / API	1	BUG-004
Tool selection / Tool execution	2	BUG-005, BUG-006
Total	**6**	

---

5. Stage-Level Attribution Summary

Ye section assignment ki **lazmi requirement** hai - "every failure must be attributed to a specific pipeline stage".

Pipeline Stage	Failures	Test Cases Affected	Notes
Ingestion	0	-	Document upload works; ingestion successful
Chunking	0	-	Chunks created successfully
Retrieval	0 direct	-	Cannot verify (blocked by BUG-004)
Context assembly	0	-	-
Generation	0	-	LLM response generation working
Tool selection	1	VOICE-015, VOICE-016	Voice Agent does not select create_task
Tool execution	1	VOICE-015, VOICE-016	Even if selected, tool does not execute
Post-processing	1	RAG-CN-001 to RAG-CN-032	Retrieved chunk content not exposed
Frontend / UI	3	TC-280, TC-289, TC-417	UI interaction and missing features
Total unique failure stages	**5**	-	-

---

6. RAG Testing Summary

Note: RAG testing revealed a **single blocking defect** (BUG-004) that prevents independent verification of retrieval. All 32 RAG test cases are recorded as "On-Hold" pending resolution.

Metric	Value
Total RAG test cases	32
Executed	32
Pass	0
Fail (blocked)	32
Root cause	BUG-004 (retrieved chunk content not exposed)
Query types covered	Direct, Paraphrased, Multi-part, Roman Urdu, Unanswerable, Conflicting, Outdated, Permission-restricted

Recommendation: Once BUG-004 is resolved, all 32 RAG test cases must be re-executed to validate:

- Retrieval relevance
- Answer groundedness
- Citation correctness
- Hallucination handling
- Access control on restricted queries

---

7. Voice AI Testing Summary

Metric	Value
Total Voice AI test cases	100 (10 UI + 90 Detailed)
Executed	100
Pass	98
Fail	2 (VOICE-015, VOICE-016)
Root cause	`create_task` tool not executing
Average turn latency	**9,938 ms**

Metric	Value
LLM latency	8,913 ms (90% of total)
STT latency	483 ms
TTS latency	429 ms
Endpointing	88 ms

Key Findings

- **Voice Agent cannot create tasks** - critical for the voice use case
- **Average turn latency ~10 seconds** - significantly higher than industry standard (1-2 seconds)
- **LLM is the bottleneck** - 90% of turn latency
- STT, TTS, endpointing are within acceptable range

---

8. Non-Functional Testing Summary

Category	Result	Notes
Performance - CRUD	Pass	Within acceptable limits
Performance - Chat first-token	Pass	Acceptable
Performance - Dashboard load	Pass	Cache functional
Security - Auth	Pass	HTTP-only cookie, JWT validated
Security - RBAC	Pass	All role isolation tests pass
Security - Input Validation	Pass	Zod (backend), Yup (frontend)
Security - XSS / SQL Injection	Pass	Rejected correctly
Security - Rate Limiting	Pass	Applied on public endpoints
Security - Prompt Injection	Pass	Rejected
Security - Data Leakage	Pass	Multi-tenant isolation verified
Reliability - AI down	Pass	Graceful error
Reliability - DB down	Pass	Graceful error
Reliability - Redis down	Pass	Graceful fallback
Reliability - n8n down	Pass	Task saved; webhook logged
Usability - Loading / Error / Empty states	Pass	Present on all pages
Usability - Accessibility	Pass	Keyboard + ARIA verified
Compatibility	Pass	Chrome, mobile, tablet verified

---

9. Compliance with Assignment Requirements

Requirement	Status	Evidence
Minimum 30 RAG evaluation questions with ground-truth answers	✅ Delivered (32)	RAG-CN-001 to RAG-CN-032
Minimum 20 agent/tool-call test cases	✅ Delivered (90+ Voice)	VOICE-011 to VOICE-100
Minimum 6 failure-injection cases	✅ Delivered (15)	VOICE-066 to VOICE-080
Every defect names failing stage	✅ Delivered	Section 5 - Stage-Level Attribution

Requirement	Status	Evidence
One permission/isolation test	✅ Delivered	SCN-059, TC-319 to TC-327, plus RAG-CN-025, RAG-CN-030
RAG test cases with ground-truth + sources	✅ Delivered	Section 6.3 template
Retrieval evaluation sheet	✅ Delivered	Retrieval Evaluation Scorecard
Agent/tool-call test cases with expected tool, args, side effects	✅ Delivered	Voice AI Section 6.4
Failure-scenario results with recovery behaviour	✅ Delivered	VOICE-066 to VOICE-080
Bug reports with full agent trace	✅ Delivered	BUG-001 to BUG-006
QA summary with stage-level attribution	✅ This document	-

---

10. Residual Risks

Risk	Impact	Recommendation
RAG chunk verification blocked	Cannot verify retrieval relevance for any query	Developer must expose chunk content in API
Voice Agent cannot create tasks	Core voice use case broken	Investigate tool call pipeline
Voice latency ~10s per turn	Poor user experience; users may think call dropped	Optimize LLM prompt/model or enable streaming
Small UI inconsistencies	Chat usability, KB management	Fix BUG-001, BUG-002, BUG-003
RAG reranking unverifiable	Cannot confirm reranking improves quality	Expose chunk scores

---

11. Recommendations

#	Recommendation	Priority	Owner
1	Expose `retrieved_chunks[]` in RAG API with content, page, section, score	High	Backend
2	Fix Voice Agent `create_task` tool execution	High	AI/Voice Team
3	Reduce LLM latency - enable streaming; use faster model	High	AI Team
4	Fix "New Chat" button click handling	High	Frontend
5	Add Delete feature to Knowledge Base documents	High	Frontend/Backend
6	Fix active chat highlighting in Previous Chats	Low	Frontend
7	Re-execute RAG test cases after BUG-004 resolution	High	QA
8	Re-execute Voice test cases after BUG-005/006 resolution	High	QA
9	Conduct full regression after fixes	High	QA
10	Document retrieval chunk format for future QA verification	Medium	Backend/QA

---

12. Test Deliverables Submitted

Deliverable	Format	Status
Requirement Analysis Report	Word	✅ Submitted
Test Plan	Word	✅ Submitted
Test Scenarios	Excel/Sheets	✅ Submitted
Test Cases (Regular)	Excel/Sheets	✅ Submitted
Test Cases (RAG - Section 6.3)	Excel/Sheets	✅ Submitted

Deliverable	Format	Status
Test Cases (Voice AI - Section 6.4)	Excel/Sheets	✅ Submitted
Retrieval Evaluation Scorecard	Excel/Sheets	✅ Submitted
Bug Reports (BUG-001 to BUG-006)	Word + CSV	✅ Submitted
Final QA Summary Report	Word	✅ This document

Overall Verdict

DevOrbis_Final is **largely stable** with strong authentication, authorization, chat, task management, dashboards, and AI features. **6 defects** were identified, of which **4 are High priority**. The most impactful issues are:

1. **RAG retrieval cannot be independently verified** (BUG-004) - blocks 32 RAG test cases
2. **Voice Agent cannot create tasks** (BUG-005, BUG-006) - breaks core voice feature
3. **Voice Agent LLM latency ~9 seconds per turn** - poor UX
4. **Two UI issues** in Chat and Knowledge Base

Recommendation: Address BUG-004, BUG-005, BUG-006 immediately. Once fixed, re-execute RAG and Voice test cases to confirm resolution. Small UI bugs (BUG-001, BUG-002, BUG-003) can be batched into the next release.

Overall QA Verdict: ⚠️ **Conditionally Passed** - pending resolution of High-priority defects.
